ABOUT THE SEMINAR

Declining throughput and retention rates are just two of the numerous challenges faced by the South African higher education sector. However, the overarching goal of increasing student success remains a top priority. Research has shown concerning trends in students' academic life cycles, specifically in their quest of becoming professional accounting graduates. This Seminar seeks to:

Stimulate discussion and inquiry among alumni, students, and academics about the experience of accountancy students and support programs in the academic life cycle of becoming professional accounting graduates.

Help us rethink, refocus, re-center our policies and practice, and subsequently yield student success.
