DR. KEITH GEHRING

Dr. Keith Gehring is a Teaching Assistant Professor at the University of Denver, Josef Korbel School of International Studies and a Faculty Affiliate at the Frederick S. Pardee Center for International Futures.

The International Futures (IFs) model is used at international organizations, government agencies, nongovernmental organizations, and private enterprises including: the New Partnership for Africa's Development (NEPAD), UN Development Programme, UN Environment Programme, South Africa's Western Cape Provincial Government, Action Against Hunger, Oxfam America, General Motors, and Google Public Data Explorer.

*International Futures (IFs)
is the most sophisticated
and comprehensive forecasting model
available to the public.*

*IFs uses our best understanding
of global systems to produce forecasts
for 186 countries to the year 2100.*

***Come learn how IFs can inform your
understanding of our world!***
